DirtGPT

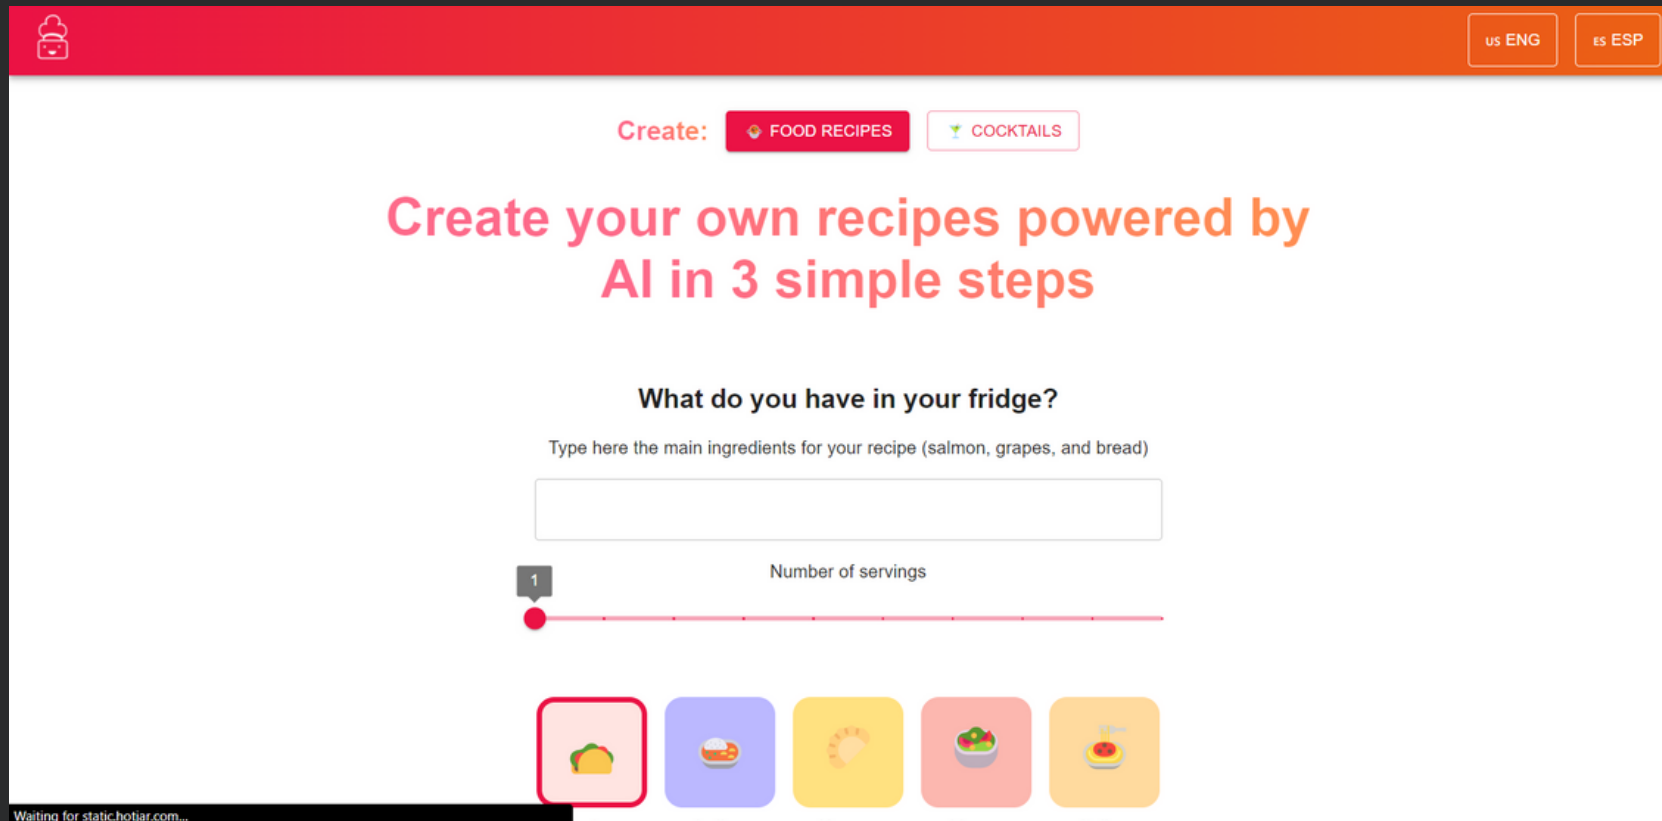

It is a web-based application that provides users with a collection of AI-generated photos and videos for entertainment and creative expression

Watchthis.dev

Functions and OpenAI that provides personalized recommendations for TV shows and movies based on user preferences and specifications.

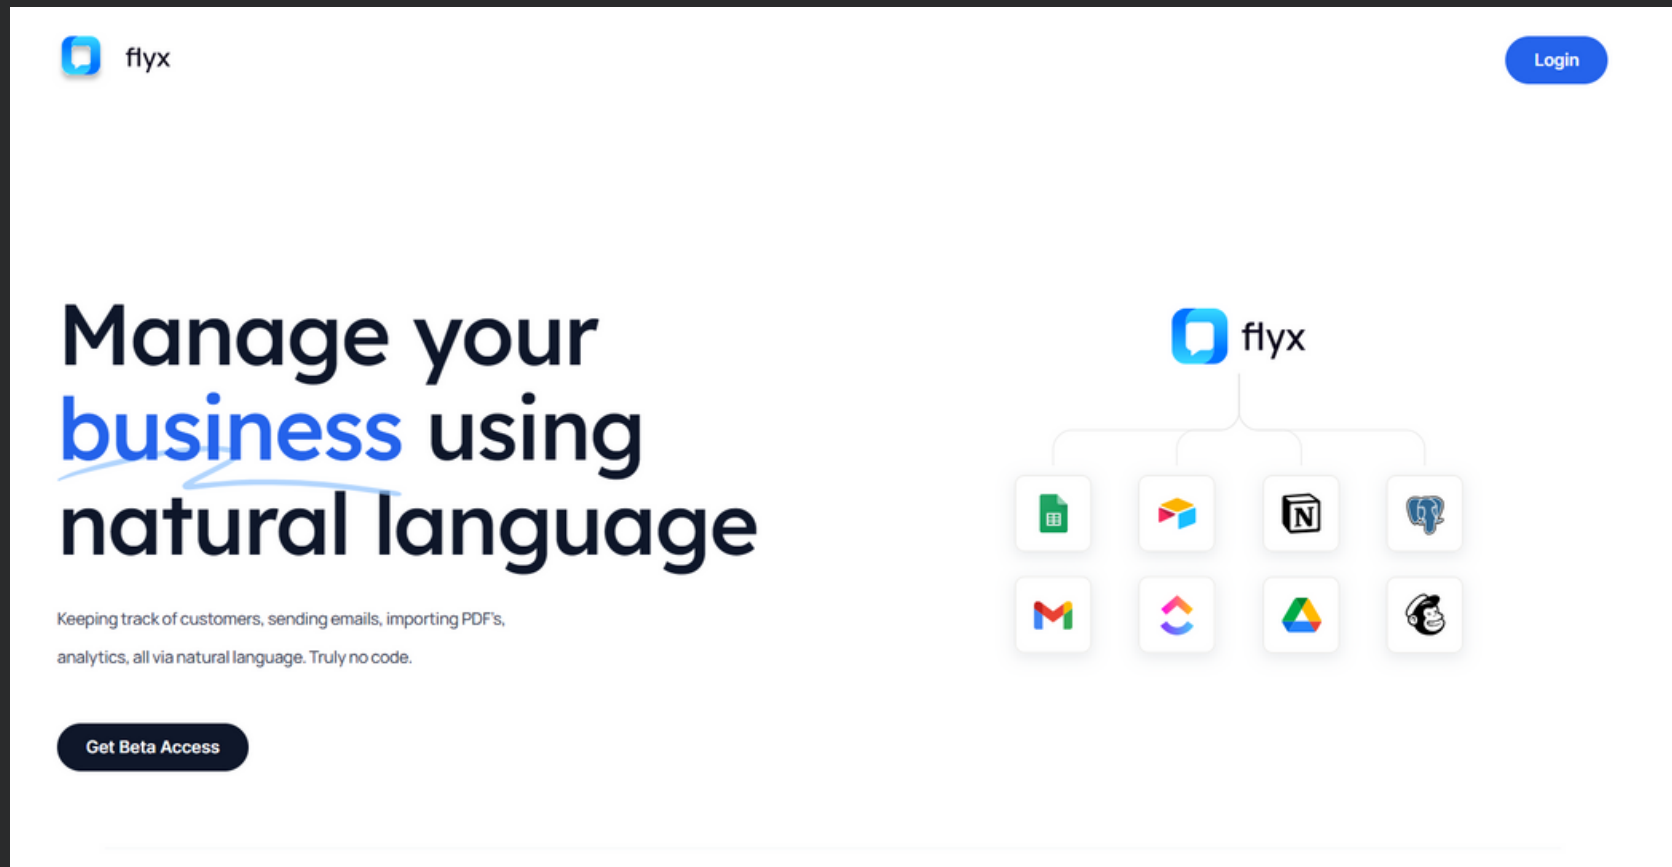

Alfoodie

The screenshot displays the Alfoodie website's recipe creation interface. At the top, there is a red navigation bar with a user profile icon on the left and language selection buttons for 'us ENG' and 'es ESP' on the right. Below the navigation bar, the main content area has a white background. It features a 'Create:' section with two buttons: 'FOOD RECIPES' (highlighted in red) and 'COCKTAILS'. The central heading reads 'Create your own recipes powered by AI in 3 simple steps'. Below this, a section titled 'What do you have in your fridge?' prompts the user to 'Type here the main ingredients for your recipe (salmon, grapes, and bread)'. A text input field is provided for this purpose. Underneath the input field, there is a 'Number of servings' section with a slider control currently set to '1'. At the bottom of the interface, there is a row of five colored square buttons with food icons: a taco (pink), a burger (purple), a pizza (yellow), a salad bowl (red), and a pizza with toppings (orange). The first button, representing the taco, is highlighted with a red border. A small error message 'Waiting for static.hotjar.com...' is visible in the bottom left corner of the browser window.

AI Chef is a revolutionary tool that enables users to create personalized recipes tailored to their dietary needs and goals

Flyx

Tool that allows businesses to manage various aspects of their operations, such as customer tracking, email management, PDF importing etc...
