CSS BEST PRACTICE

css shorthand

```css
.home {
    background-color: #000;
    background-image: url(images/bg.gif);
    background-repeat: no-repeat;
    background-position: left top;
    color: #ffffff
}
```

```css
.home {
    background: #000 url(images/bg.gif) no-repeat left top;
    color: #fff;
}
```

structure a stylesheet top to down

🤷‍♂️

```css
#side {
    /* ... */
}

#side ul {
    /* .... */
}

#content {
    /* ... */
}

#header {
    /* ... */
}

#header ul {
    /* ... */
}

/* FOOTER */
#footer {
    /* ... */
}

#footer div {
    /* ... */
}
```

✅

```css
#header {
    /* ... */
}

#header ul {
    /* ... */
}

/* SIDE BAR */
#side {
    /* ... */
}

#side ul {
    /* .... */
}

/* CONTENT */
#content {
    /* ... */
}

#content p {
    /* .... */
}

/* FOOTER */
#footer {
    /* ... */
}

#footer div {
    /* .... */
}
```

keep individual selectors to a single line

```css
.name, .number, .email, .img {
    display: flex;
    justify-content: space-evenly;
    margin-right: 30%;
    align-items: center;
    margin-bottom: 30px;
}
```

```css
.name,
.number,
.email,
.img {
    display: flex;
    justify-content: space-evenly;
    margin-right: 30%;
    align-items: center;
    margin-bottom: 30px;
}
```

Don't prefix property values with a leading 0

```css
.selectors {
    margin-top: 0.5px;
}
```

```css
.selectors {
    margin-top: .5px;
}
```

Avoid specifying units for zero values

```css
.selector {
    border: 0px;
}
```

```css
.selector {
    border: 0
}
```

Declaration property in order

```css
.selector {
    /* positioning */
    position: absolute;
    top: 0;
    right: 0;
    /* box model */
    display: block;
    width: 50%;
    max-width: 500px;
    padding: 1.5rem 2rem;
    border-radius: 16px;
    /* typography  */
    font-size: 2rem;
    font-family: sans-serif;
    /* visual  */
    background: var(--bg-color);
    border: 12px solid var(--bg-color);
    filter: var(--filter);
}
```

use meaningful class names with lowercase and dashes

```css
1  .dltButton {
2       ...
3  }
4
5  .detail {
6       ...
7  }
8
9  .msg {
10      ...
11 }
12
```

```css
1  .success-message {
2       ...
3  }
4
5  .delete-button {
6       ...
7  }
8
9  .contactdetail {
10      ...
11 }
```
